DETAILED ACTION

35 U.S.C. 112, second paragraph

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-5: rejected under 35 U.S.C. 112, second paragraph

Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-5 are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors. See for example, claim 1, lines 6 and 9, "said pressing part is placed the freely onto the top ..." and "installed freely", respectively. Claim 1, line 11, which includes the phrase "the hollow body locates corresponding to the connection". Claim 1, lines 9-10, "said brake bar exposes externally to...". Claim 1, lines 10-11, "said pressing part can not move forward or backward for said stopper blocks said brake bar". See claim 2, lines 1-2, "said gas outlet having a trigger and an gas lever". See also claim 4, line 3, "said adjustable rod exposes from the hollow body". And, claim 5, line 3, an open hole of said hollow body that corresponds to the gas inlet valve".

In claims 1-5 terms such as “the free”, “downward”, “inside”, “forward”, “backward”, “the bottom”, “the top”, “the right side portion”, etc. are a relative terms which renders the claim indefinite.

Claims 1-5 include numerous instances of terms which do not have a proper antecedent basis. See for example, “the center opening”, “the inner side”, “the free end”, “the top of said body”, “the top of said brake bar”, “the opening of said pressing part”, “the bottom of said brake bar”, “the bottom of said free end”, “the same side of said starter”, “said brim blocks”, “the other side of said gas outlet”, “the other side of said gas tube”, “the inner brim”, “the other side of said gas lever”, “the top of said brake bar”, “the other side of the tank”, etc.

Claims 1-5 do not accurately describe the invention. For example, in claim 1, lines 12-13, the phrase “on the bottom of said pressing part” should be - - by engaging a top surface of said pressing brim”.

Double Patenting

Claims 1 and 3 are provisionally rejected under the judicially created doctrine of double patenting over claims 1 and 7 of copending Application No. 10/671,831. This is a provisional double patenting rejection since the conflicting claims have not yet been patented.

The subject matter claimed in the instant application is fully disclosed in the referenced copending application and would be covered by any patent granted on that copending application since the referenced copending application and the instant application are claiming common subject matter, as follows: Claims 1 and 3 of the present application differ from claims 1 and 7 of the copending Application No. 10/671,831 only by a more narrow recitation of the ignition device as a "piezo-electric unit" rather than the more broadly defined "electronic pilot" (Application No. 10/671,831). The claims including the "piezo-electric unit" of the present application therefore anticipate the more broadly defined "electronic pilot" in Application No. 10/71,831.

This is a provisional obviousness-type double patenting rejection.

Allowable Subject Matter

Claims 2, 4 and 5 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

See the attached PTO FORM for prior art made of record that is not relied upon, which is considered pertinent to applicant's disclosure.
